

## ENVIRONMENTAL POLICY

Considering the importance of ENVIRONMENTAL issues in the business context, METALÚRGICA FUNDIBRONZE establishes the guidelines below as a policy, the objectives of which are primarily the elimination or mitigation of impacts caused to the environment by its activities.

1. Comply with current legislation, adapting to established environmental requirements;
2. Maintain an Environmental Management System that plays a leading role in business management that has environmental protection and continuous improvement in this regard as its principles;
3. Assess risks, opportunities and define environmental goals for its activities, monitoring/measuring results;
4. Record and control environmental management data and promote its dissemination;
5. Make sustainable and rational use of natural capital, in particular water, managing the risks related to its scarcity and ensuring that the water used returns to the environment in the desired conditions;
6. Reduce greenhouse gas emissions, where technically and economically viable, and solid waste through reduction, reuse and recycling when applicable;
7. Develop and prioritize suppliers who have the same commitment to environmental preservation, especially regarding the use of environmentally friendly materials in their products and packaging;
8. Dispose of contaminated waste in an environmentally and legally correct manner;
9. Disseminate the principles and requirements of FUNDIBRONZE's Environmental Management System among employees, suppliers, service providers and customers, promoting environmental education;
10. Maintain an open dialogue in places impacted by the company's activities in order to meet the expectations of interested parties.
11. Apply the hierarchy principle of mitigating environmental impacts:  
AVOID / MINIMIZE / REPAIR / COMPENSATE.
